

MUHAMMAD SHARIQ

Backend Developer | MERN Developer

+92-313-6523899 | shariqx5@gmail.com | Baldia Town, Karachi | [muhammad-shariq](https://muhammad-shariq.com)

Self-taught full stack web developer with proficiency in node.js, react & PHP. I have experience in designing scalable software, implementing best practices, and writing clean code. In the last 1.5 years, I have worked on diverse projects that include Management & Government Systems, Food Ordering & eCommerce Solutions. Thousands of people from Pakistan, Australia, and the USA have used these solutions that ultimately have increased my passion for developing more software. Currently, I am looking for a position that can help me in the betterment of my skills and where I can design solutions to more real-life problems.

Stepago to help people in tracking their daily walk steps. It also includes a proximity marketing system that gives rewards to people for their participation.

Experience

Backend Developer – WeUNO

03/2021 – Present

- Started organizing weekly presentations on tech topics like modern trends, design principles, refactoring, a system design that have increased the team's knowledge and interest.
- With the help of the stripe subscription module saved hours of effort and time in one of the projects. The project was delivered on time with more efficiency due to this.

Backend Developer – Ace Digital Pvt Ltd.

07/2020 – 03/2021

- I helped them in generating the SRS document and high & low-level design document for their CRM software. Due to which they were able to find the best solution according to their requirements. Before this, they had CRM, but it was not fulfilling all of their needs.
- Changed their technology stack from legacy systems to modern languages such as node.js and react. It helped them in speeding up their development time & reduced unnecessary complexity.

Backend Developer – Freelance

03/2020 – Present

I am working with a team of software engineers in Pakistan. We have developed a complete food ordering solution named (Pinfood) for a German client. Pinfood included complete solutions for restaurants and users. We have also developed an application name

Education

BS Software Engineering – September 2020

Usman Institute of Technology (NED)

Projects

Rimattire – WeUNO

Rimattire is USA based startup focused on providing used tire and rim services to drivers moving on highways. Tire shop & junkyard can sell their tire and rims. Rimattire suggests tires and rims nearest to the user location & helps in finding the shop with a completely online payment system. My responsibility was the development of backend APIs, Admin Panel, and web on react.js.

Pinfood – Freelance

Pinfood is complete food ordering designed by following the concept of uberisation for restaurants & customers. Customers can search & order any food item from their nearby restaurants. Merchant has a separate app & portal for management of orders, employees, and customers. This project is going to be launch soon in Germany. In this project, my part was order processing, cart management, onboarding, payment gateway & complete merchant app.
